

Audio Desk Systeme

Vinyl Cleaner

The first and only LP Cleaning Machine incorporating both ultrasonic and mechanical cleaning cycles achieves a new (and fully automated) level of clean!
USA retail: \$3495

Proprietary vinyl cleaning concentrate cleans 100 used LP's, or 200 new LP's: \$14.95

The Audio Desk Systeme CD Edge Cutter was named 2006 Product of the Year by *Hifi+* magazine in the UK.

The original Audio Desk Systeme is a motorized cutting device designed to "true" the shape of the CD to reduce mechanical jitter, also bevelling the edge to 38° to reduce laser scatter. The process takes under 60 seconds and results in pronounced improvements in focus, transient attack, detail and transparency.

USA Retail Prices:
CD cutter: \$999.95

DIGIstrobo

DIGISTROBO is a unique new digital instrument for extremely accurate measurement of turntable speed. Microprocessor-based with a precise Quartz crystal.

Different from any other strobe, HIFI4MUSIC's DIGISTROBO measures the actual speed of the platter at any moment, even while the record is playing!

USA Retail Price: \$159.95

HiFi Tuning

New for 2010, the larger 6.3 x 32mm "SilverStar" version of HiFi-Tuning's upgrade fuses is now available. All silver from tip to tip with thicker silver end caps for the large fuses for even better performance. Even more open and dynamic than the standard-setting Gold-plated fuses from HFT, a *Stereophile* "Recommend Component."

Both our Original Gold over Silver and the new SilverStar fuses are:

- hand made and tested in Germany
- pure silver wiring
- ceramic casing with better controlled resonance than glass

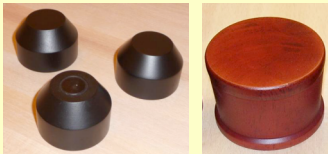

USA Retail Prices as of 2/1/09:

New Silver Star: 5 x 20mm (.75") size, \$39.95

6.3 x 32mm (1.25") size, \$59.95

Classic Gold Plated: 5 x 20mm (.75") size, \$39.95

6.3 x 32mm (1.25") size, \$49.95

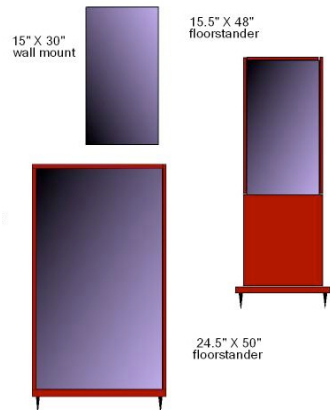

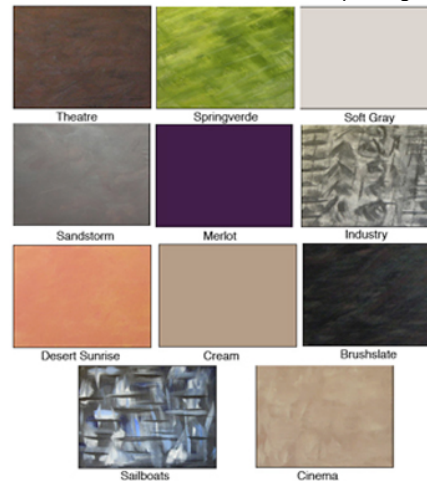

HiFi-Tuning's new "Ultimate Cones" (\$599/3) and "Vinyl Resonance Optimizer" (\$699) are exciting new products consisting of precious metal (platinum) and a special wood-quartz-metal design, which will markedly improve imaging, dynamics and musical color and expressiveness.

RoomTuneART

Designer **Michael Green** further refines his acoustic treatment concept first developed for the Herman Miller design house, and proves that effective acoustic treatment can be an attractive addition to your room!

Wall-hanging and floor-standing options available.

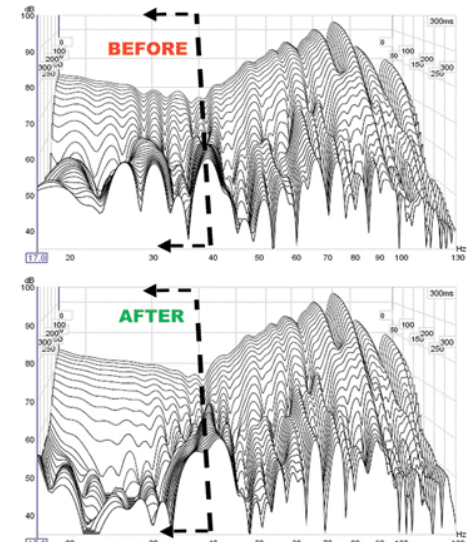

A palette of color and pattern choices are available, all for "standard" pricing.

Cathedral Sound

A small, décor-friendly means for reducing room acoustic problems, especially those associated with bass standing waves. This Patent Pending use of the well-known Venturi effect for the first time for room acoustics, results in the only small acoustic panel effective on deep bass response below 100 Hz, where room nodes are principally excited. Usually mounted in the upper corners where two walls meet the ceiling, these Panels help to equalize the room. Not only is bass more tuneful with greater impact, but the midrange (and dialog) is more articulate, and sound stage size and layering is significantly improved.

Dimensions: 11" x 16" x 2" (28 x 41 x 5 cm)
Shipping Weight: 12 lbs. Per pair (~5.5kg)
Retail Price: \$179.95 per pair
