

# WA-QUANTUM GMBH

RETAIL PRICES EFFECTIVE: JANUARY 1, 2012

WA-Quantum GmbH is a manufacturer of high technology products. Among their products are this line of "Chips" operating at a sub-atomic Quantum level, which improve the efficiency of current flow and signal transmission in audio devices including fuses, capacitors, phono cartridges and tonearms, transformers, transducers, and audio cabling.

Special chips are also available for use with both electronic and acoustic musical instruments.

In each case the Chip is mounted on an adhesive backing which can be attached to the device. The Chips are "programmed" for their specified applications.
